2023 CYCLE 2

MUN Event

What is AUEP?

AlFaisal University Enrichment Programs (AUEP) are demanding and innovative broad courses that bridge the gap between high school and university. The dynamic approach at AUEP exposes you to many job paths and improves your personal and social abilities. Designed to improve critical thinking skills, the program includes such courses as

- **Artificial Intelligence**
- **Aspiring Physician**
- **Metaverse Academy**
- **Beautiful Minds**
- **Cyber Security and Ethical Hacking**
- **EE2 X Shine**
- **Empowered Entrepreneurs**
- **Mastering English**
- **Apps and AR Game Developers**

AUEP EVENTS

Spark Event: SEEK DISCOMFORT

SPARK is an engaging activity of the AUEP to help you step outside of your comfort zone by intentionally seeking discomfort. This is a card game to challenge you every day to try new things. From skydiving to running a marathon, this is the game for you. It is a wonderful game for those who fear public speaking, people who don't like to reveal secrets, people who want to accomplish incredible things but would have otherwise chosen not to.

MUN Event: Empowering Students through Debate

The **AUEP MUN (Model United Nations)** provides students with a platform to discuss important global issues. In this year's conference, discussions revolved around the death penalty and FIFA. The AUEP MUN allowed students to explore ethical, moral, and legal aspects, encouraging them to understand different viewpoints. Abdulrahman Bahanan, representing the Central Republic of Africa, excelled in the death penalty debate, showcasing his commitment to understanding complex issues and presenting persuasive arguments.

AI Acadamy

Dr. Areej, AI Academy Instructor

"The **AUEP AI Academy** aims to demystify AI in all its complexity for pre-collegiate students while providing them with an early insight into the promises and perils of AI-enabled systems. Alfaisal's AI Academy offers an intensive learning experience taught by AI experts and AFU alumni. Through experiential workshops and project-based learning, students collaborate with mentors on socially impactful AI projects and receive guidance on pursuing AI careers, and gaining first-hand experience of being an engineer, a product manager, or a data scientist."

INTERVIEWS WITH OUR PEERS

AUEP Students

What Course Did You Take?

Jawad: Aspiring Physicians

Asmaa: Beautiful Minds

Luqman: Cybersecurity and Ethical Hacking Bootcamp

Khadeejah: Metaverse in Health Innovation.

What Did You Discuss During The Course?

Jawad: Medical basics, such as different systems, modern epidemics, and vaccines.

Asmaa: We discussed a variety of topics, but mainly the structure and function of the brain.

Luqman: Coding, passwords, and types of attacks

Khadeejah: We discussed how we can bring healthcare services through the virtual world.

What Did You Like About This Course?

Jawad: The environment, the balance between fun and learning, the subject itself.

Asmaa: Making new friends.

Luqman: My teacher and I sit in front of a computer.

Khadeejah: I thought the VR headset and the Oculus are just used for video games. But you can do surgeries and even train students who live in another country!

Aspiring Physicians

Mastering in English Communication

The AUEP English program is for students who want to take their English skills to the next level. It's a college-level English course for developing a full range of skills – reading, writing, and speaking – from learning how to use the right words, simplifying your message, thinking critically, and speaking confidently. This is a fun, interactive program that will empower you to communicate your ideas clearly and effectively in English. It's a great opportunity to boost your confidence and be well-prepared for college.
