What is AUEP?

Alfaisal University Enrichment Programs (AUEP)

are demanding and innovative broad courses that bridge the gap between high school and university. The dynamic approach at AUEP exposes you to many job paths and improves your personal and social abilities. Designed to improve critical thinking skills, the program includes:

- Artificial Intelligence
- Aspiring Physician
- Metaverse Academy
- Apps and AR Games
- Beautiful Mind
- Cybersecurity
- Mastering English
- Empowered Entrepreneur
- EE2 X Shine

Light your SPARK

SPARK is an engaging activity of the AUEP to help you step outside of your comfort zone by intentionally seeking discomfort. This is a card game to challenge you every day to try new things. It is a wonderful game for those who fear public speaking, people who don't like to reveal secrets, people who want to accomplish incredible things but would have otherwise chosen not to.

Dr. Noor, Metaverse Health Innovation Academy Instructor

"I focused on the technology and digital transformation of healthcare using XR applications and platforms. I enjoyed the role-playing games we had to address policies and data-related issues in the metaverse. I also have invited esteemed speakers and trainers in the field who gave a great insight into the digital world of healthcare, including robotics, simulation technologies and Virtual Reality engines. This made a positive impact on students, and some have even advanced into a sustainable project that will develop into a product."

The AUEP MUN

The AUEP MUN (Model United Nations) provides students with a platform to discuss important global issues. In this year's conference, discussions revolved around the death penalty and FIFA. The AUEP MUN allowed students to explore ethical, moral, and legal aspects, encouraging them to understand different viewpoints.

Mastering English Communication

The AUEP English program is for students who want to take their English skills to the next level. It's a college level English course for developing a full range of skills – reading, writing, and speaking – from learning how to use the right words, simplifying your message, thinking critically, and speaking confidently. This is a fun, interactive program that will empower you to communicate your ideas clearly and effectively in English. It's a great opportunity to boost your confidence and be well prepared for college.

AUEP Students Speak

What Course Did You Take?
Jawad: Aspiring Physicians
Asmaa: Beautiful Minds
Khadeejah: Metaverse in Health Innovation.

What Did You Discuss During The Course?
Jawad: Medical basics, such as different systems, modern epidemics, and vaccines.
Asmaa: We discussed a variety of topics, but mainly the structure and function of the brain.
Khadeejah: We discussed how we can bring healthcare services through the virtual world.

What Did You Like About This Course?
Jawad: The environment, the balance between fun and learning, the subject itself.
Asmaa: Making new friends
Khadeejah: I thought the VR headset and the Oculus are just used for video games. But you can do surgeries and even train students who live in another country.

The work of: Randa Al Babtain, Abdulrahman Bahannan, Leena Al Babtain, Ahmed Al Sharidah, Maha Hashlan, Mohammed Aasim, Khadeejah Asna, Abdulaziz Al Babtain, Razan Hijazi.
